FLATIRONS

Get access to the proven intelligent aerospace technical content management system, trusted by the world's top airlines and manufacturers
Flatirons Fleet Edition

Proven technical content management for airline maintenance organizations

Get Peace of Mind with the Flatirons Fleet Edition

Airlines have invested in Flatirons Technical Content Management Solutions for nearly 30 years. The Flatirons Fleet Edition allows airlines to import, revise, and deliver the latest maintenance documents to desktops, tablets, and other mobile devices. By offering single-system access to the information needed to service multi-manufacturer aircraft, engines, and components, Flatirons Fleet is the ideal cloud-based, cost-effective offering for airline maintenance organizations.

Standard with your Flatirons Fleet Edition subscription, you get access to our interactive technical publications viewer with inline editing through Flatirons Pinpoint and Flatirons Pinpoint Mobile. This includes virtualized hardware, software, and services necessary to deploy, deliver, maintain, support, and update the software. We do all the hard work while you get all the benefits of a cloud-based solution that lowers your IT costs and allows you to scale up or down as your needs change. Your airline can be rapidly set up and provided with immediate productivity, asset utilization, and compliance benefits. And, unlike many software investments, the Return on Investment (ROI) for Flatirons Fleet is immediate.

With the Flatirons Fleet Edition, we host, manage, and deliver all of your airline technical content, so you can focus on what you do best. Flatirons delivers a mission-critical solution with first-class performance, security, and fault tolerance for your peace of mind and budget predictability.

Something for Everyone: Always Have Access to the Information You Need—When & Wherever You Need It

For Maintenance Technicians

Deliver timely, relevant, customized, and accurate information where and when it is needed for more effective repair and maintenance performance

For IT Departments

Deploy a technical information management solution that doesn't require a huge capital expenditure or tie up an IT budget

For Finance and Procurement

Rapidly reduce costs and increase revenue with the industry-leading, cost-effective solution from a field-tested partner with a demonstrated history of success

Get Instant Access to Technical Content with the Most Innovative Mobile Maintenance Solution

For airlines to operate more efficiently than their competitors, they must rely on access, control, and real-time distribution of their vital technical information to work more efficiently, enabling them to supply a differentiating service level to customers. Relying on multiple OEM systems for maintenance information or waiting for OEM revisions limits your ability to find areas of competitive advantage. Using Flatirons Pinpoint authoring functionality, you can manage your authoring and revision management on the same platform as your technical publication documentation viewing. Information is readily available at your fingertips.

Control your own content

Take charge of your data and make changes when you require them; Increase efficiencies since you are no longer inhibited by an OEM to enable your own efficiencies

Immediately achieve improved maintenance productivity

Get online and offline mobile access to the multi-manufacturer airframe, engine, and component information in a single, modern IETP viewer that supports various devices and operating systems

Reduce your exposure to regulatory non-compliance risk (FAA, EASA, IATA requirements)

Get access to the latest information by incorporating Service Bulletins and Engineering projects

Capture your hard-earned operational experience and competitive advantages

Use direct inline editing to supplement your secure technical content with the operational experience and technical knowledge you have acquired over years of maintenance operations

Attain demonstrated higher aircraft utilization

Realize improved airplane utilization by completing repairs quickly and accurately with a faster return to service

Boost on-time performance

Get mobile access to the latest information, policies, and procedures, allowing maintenance issues to be corrected quickly and efficiently

Easily Visualize and Edit Aviation Data from Your Tablet or Mobile Device

Flatirons Pinpoint and Flatirons Pinpoint Mobile are the industry-leading interactive electronic technical publications (IETP) viewers optimized to keep aircraft flying. Through continuous improvement, our software is regularly updated with feature enhancement requests from the best airline maintenance technicians. With the Flatirons Pinpoint and Pinpoint Mobile viewers, you get access to the latest approved maintenance, engineering, and company manual documentation for all your fleets, engines, and components on virtually any device type.

Add value to your organization with straightforward and efficient authoring and revision management:

- Allow direct loading of OEM data (Airframe, Engine, Components)
- Customize your data with local edit of maintenance manuals using the Pinpoint viewer
- Easily upload private and secure supplemental data for all manuals that are only accessible by your workforce: PDF, Videos, 2D graphics, 3D graphics, spreadsheets, and active links to your other publications loaded in Pinpoint
- Enjoy efficient and timely PDF manual loading of:
    - › CMMs provided by Component Manufacturers or Airframe/Engine OEMs
    - › Service Bulletins issued by OEM
    - › Engineering Orders /Engineering Projects Airlines have issued internally
    - › Airline-developed internal policy manuals and internal forms developed by the operator
    - › Link internal PDFs to Airframe/Engine Manuals with supplemental links
    - › Regular batch loading of PDFs, instead of one by one
- Effortlessly share contents with MRO and/or contracted maintenance organizations
- Access multiple revisions of manuals with functionality to control what the end user can view
- Provide efficient interactive Pinpoint Mobile viewing for both online and offline users
- Get timely Read & Sign-off acknowledgment of revisions, critical documentation, and communications
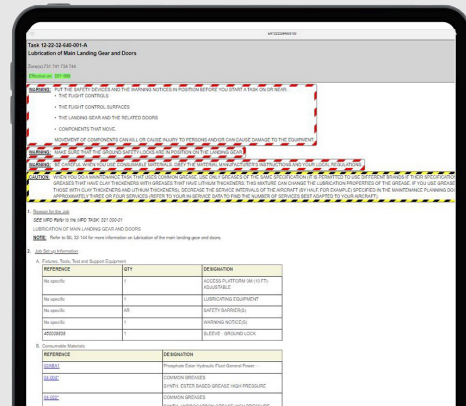

Enhance your productivity:

- Quickly view embedded content–increase efficiency by expanding embedded links within a manual and reading the linked content in-line within the open manual
- Perform intuitive predictive searches with filter functionality across all manuals, graphics, and libraries
- Get efficient manual-specific optimized context searches: e.g., TSM-fault codes, FIN, P/N, Wiring Manuals
- Boost productivity with full-screen content display, split-screen, thumbnail graphics navigation, and magnification features
- Augment content with public company wide or user-private annotations displayed in the viewer
- Navigate to frequently accessed information that users have bookmarked

Raise Your Game

The Flatirons Fleet Edition provides game-changing capabilities to airlines at a fraction of the adoption cost of more traditional premise-based software solutions. For airlines looking for ways to separate themselves from the competition and find critical areas in which proprietary best practices can increase efficiency, the Flatirons Fleet Edition is the ideal solution. Flatirons provide your maintenance and engineering teams with a solution that will maximize the impact of your maintenance technicians and help your company achieve superior operational performance.

> " *I love the local editing capability right inside the Pinpoint viewer. I can easily modify SGML/XML versions of key manuals like AMM, EMM, AIPC/EIPC, and CMM without the need for a separate authoring tool.* "
