

PATENT MANAGEMENT

Turning Content
Into Knowledge®

Anticipating, Innovating & Inspiring

Bring your IP data
to the next level

SOLUTIONS FOR IP OFFICES

Flatirons Jouve has been structuring patent-related data for the world's biggest offices for over 25 years. Having invested very early in R&D, the group developed a high-quality industrial and technological platform, combining process management and cutting-edge technologies such as machine learning and semantic search.

PRODUCTIVITY AND QUALITY - EXPERT SEARCH

Data on trademark and patent applications require an effective industrial backbone and high-quality processing. Whether preparing applications, classifying large data volumes, or semantic searches, Flatirons Jouve can help you at each step of your business processes to ensure you are supplied with reliable, comprehensive information. This is combined with premium services enabling you to access this data easily.

Data Capture

- Platform for managing physical and digital streams
- Data acquisition online and by e-mail
- Letters, documents, photos
- Messages, e-mail attachments
- Faxes

Data Process

- Paperless processes & Image processing
- Data extraction
- Enrichment
- Data reconciliation
- Quality checks
- Communication portals

Dissemination

- Web, tablets, mobile
- Printing, routing
- Email campaigns, SMS
- Software development
- EDM & Workflow
- Physical archiving

WHY FLATIRONS JOUVE ?

- /// 25 years serving major IP Offices worldwide
- /// Extensive patent data expertise, from filing through to classification, examination, dissemination and analysis
- /// Continuous intensive R&D investment
- /// Industrial workflows for high quality data processing
- /// Expertise in semantic and large data search tools

COMBINING SERVICE QUALITY AND AUTOMATED PROCESSING

The protection of trademarks and patents provides a means of ensuring innovation, competitiveness and economic growth. National and international intellectual property offices combine efficient services and comprehensive, accessible, and reliable information with speed, integrity and quality. By offering clearance search and search-by-similarity tools in natural language, intellectual property offices can provide an effective and accessible service meeting the requirements of their customers, who may or may not be business information specialists.

Industrial Property

By protecting trademarks and patents, it is possible to encourage innovation, competitiveness, and economic growth. One of the main tasks of IP offices is to enable access to information from industrial property documents.

Machine Learning

Using artificial intelligence and automated processing with semantic search to cope with the boom in patent applications.

FLATIRONS JOUVE™

ANTICIPATING, INNOVATING & INSPIRING

Flatirons Jouve™ provides solutions and services that organizations need in order to harness their most complex data, optimize their business processes, and create compelling digital experiences. A longtime leader in content driven markets like aviation and publishing, Flatirons Jouve™ also provides disruptive innovations to meet knowledge

delivery requirements in the manufacturing, banking, insurance, healthcare, education and public sector.

Flatirons Jouve™ counts 2,500 employees and operates worldwide in 15 countries from offices in North America, Europe, Asia, and Africa.
