

Services

Our Training Development Services Include:

- Web-based and instructor-led training
- Step-by-step procedural guides
- Learning Management System (LMS) hosting
- Graphic design
- Video production

Part of our process is to assess your training requirements and determine the areas in which training rigor and depth needs to be highest. Through this consultative approach, we can tailor and prioritize the training materials delivery plan to get the maximum impact for your organization and staff.

Web-based Training

We offer three levels of interactive, Web-based training: rapid, standard, and advanced. For all of these development options, our pricing includes curriculum development, editing, audio, and visual support to enhance the student's learning experience. Our expertise also allows us to deploy any of these training types as SCORM packages, enabling reusability of content. Our courses retain progress tracking and score recording functionality in a wide variety of LMSs.

Instructor-led Training

We understand that eLearning is not a perfect fit for every situation. Your employees and customers may still require face-to-face time with an instructor or hands-on training with a tool. If you need to maintain the classroom, Flatirons Solutions can help develop your materials using the latest technology.

Online University

Our LMS enables customers to deliver SCORM-compliant training while they also manage and track all aspects of a training program. Our LMS can be installed within your IT infrastructure or we can host and maintain the LMS for you. The key features of our LMS include:

- Web-based surveys and online testing
- Web-based delivery, management, and performance tracking
- Customized reports
- Customized user interface

Flatirons Solutions™ provides content lifecycle management solutions to global Fortune 1000 customers in aerospace, automotive, electronics, financial services, government, healthcare, and publishing. It has helped organizations efficiently deliver the right information, at the right time, to the right people by leveraging structured content and digital media—Turning Content into Knowledge®. Flatirons Jouve operates worldwide from offices in Africa, Asia, Europe, and North America.

InfoGuides

Through highly detailed procedures, InfoGuides quickly and efficiently provide experience on a particular product. Quality results of individuals who use InfoGuides to perform procedures are similar to those of a veteran employee. Our blend of images, video, and text provides users with a step-by-step guide that enables them to perform procedures correctly and consistently. Our research has shown that InfoGuides accelerate the speed at which employees learn while maintaining quality.
